University Of Buea Time-table Management System
Course Outline

Faculty Name	COLLEGE OF TECHNOLOGY
Department Name :	COMPUTER ENGINEERING
Course title	Artificial Intelligence
Course Code	CEC621
Department Code:	CE
Academic Year	2026/2027
Semester	*1*
Name of Instructor	Dr. Tchapga Tchito

S/N	Week	Topic	Activity
1	1	Background and Introduction	L
2	1	Ethical considerations in AI & New Trend in AI	L
3	2	Data Cleaning Procedures with Imbalance dataset	L
4	2	Single Feature Linear Regression	L
5	3	Gradient Descent and Cost Function	P
6	3	Multi-Feature Linear Regression	L
7	4	Save Model Using Joblib And Pickle	P
8	4	Dummy Variables Handeling	P
9	5	Data Correlation & Visualization	P
10	5	Logistic Regression Binary Classification	P
11	6	Logistic Regression Multi Class Classification	P
12	6	Project: Cleaning and Creating Models on Dataset	P
13	7	BLOCK PERIOD FOR CAs for Large courses	
14	7		
15	8	Support Vector Machine (SVM) & Naïve Bayes	P
16	8	Decision Tree & Random Forest	P
17	9	Project: Search the best Model	P
18	9	Kfold & Cross Validation	P
19	10	Model Evaluation [F1-Score, Precision, Sensitivity]	P
20	10	Model Evaluation [Grid Search]	P
21	11	Unsupervised Learning [K-Means]	P
22	11	Unsupervised Learning [PCA]	P
23	12	Project: Unsupervised Learning	L
24	12	Introduction to Deep Learning	P
25	13	Artificial Neural Network (ANN)	P
26	13	Convolutional Neural Network (CNN)	P
27	14	Project: Models Evaluation to Pick the best	P
28	14	Tutorials Questions	T

Type of Activity per Topic

Activities	Code
Lecture	L
Tutorial	T
Practical	P
